APLICACIÓN 1

KREA 2 TURBO

Krea 2 Turbo Image Generator

Generate new images or edit a source image with Krea 2 Identity. Edit.

This Space might be taken down soon. Please **duplicate** this Space (top-right menu) → Duplicate this Space or **clone** it locally (git clone https://huggingface.co/spaces/nas1x/Krea-2-Turbo_1121) so you keep a working copy. Once you have a local copy you can modify it to run on **Bundled**, or local GPU, or any other environment.

PromptTaster 色濃大圖 Krea2

prompt

Considering a collection of 400 vinyl records, design a storage shelving unit made of light-brown natural wood to be installed on a wall measuring 2 meters wide by 2.4 meters high.

Organize the shelving divisions according to the different music genres represented in the collection, making it easy to classify and locate the vinyl records.

The design should feature a functional and easily accessible layout that allows the records to be easily removed and stored, optimizing both the available space and the overall experience of searching for and organizing the collection.

base Krea checkpoint:

PontMaster 色覚大脳 krea2

prompt:

Design a circular graphic sticker measuring 4 cm in diameter to identify the owner of the collection.

The sticker should have a white background with orange text, incorporating an element of minimalist iconography that complements the composition in a simple and recognizable way.

The design should be minimalist, aesthetically pleasing, and legible, using the initials LAAG as the main identifying element.
